Experience

TURNKEY MAINTENANCE-FREE SOLUTIONS

For assets experiencing severe corrosion and degradation, operators must decide whether to repair or replace components. CFRP repairs offer an **effective alternative to complete system replacement**. As a cost-effective repair solution, CFRPs can be applied to a variety of designs and applications. Our customized CFRP solutions are designed to exceed each client's unique needs, **extending asset life by 50+ years**.

Trust a reliable specialty contractor to provide high-quality solutions. Contact A&G Industrial Services to learn about our client's successes.

THE CFRP ADVANTAGE

Our uniquely designed process can be installed over previously installed systems, offering numerous benefits:

- Faster and more economical than traditional pipeline replacement
- Add up to 1,000 psi of strength to existing systems
- Significantly reduce corrosion, erosion, and impact concerns
- Repair cracks, leaks, holes, dents, or thin areas
- Eliminate emergency repair costs
- Restore and increase design strength, stiffness, or fatigue resistance
